Purpose

The Department of Community and Government Services (CGS) is pleased to present this report on the Government of Nunavut (GN)'s procurement and contracting activities for the 2010/11 fiscal year.

Objective

CGS is committed to ensuring fair value and ethical practices in meeting its responsibilities. This is accomplished through effective policies and procedures aimed at:

- Obtaining the best value for Nunavummiut overall;
- Creating a fair and open environment for vendors;
- Maintaining current and accurate information; and
- Ensuring effective approaches to meet the GN's requirements.

Introduction

The *Procurement Activity Report* presents statistical information and contract detail about GN contracts as reported by GN departments to CGS's Procurement, Logistics and Contract Support section.

Contracts entered into by the GN Crown agencies and the Legislative Assembly are not reported to CGS and are not included in this report.

Contract information provided in this report reflects contracts awarded and reported during the 2010/11 fiscal year. CGS can not guarantee the accuracy of contract information reported by departments, however, CGS makes best efforts to verify the information and ensure departments are fully aware of the reporting requirements set out in the Nunavummi Nangminiaqtunik Ikajuuti (NNI Policy) and applicable GN policies and procedures manual.

Report Overview

This report focuses on the distribution of contracts awarded to corporations, organizations and sole proprietors.

Charts and tables are used to illustrate the information presented.

CGS aims to enhance its reporting of the GN's contracting activities each year as part of its commitment to ensure transparency and accountability. Many factors can influence the comparability of data. Unusually high or low values for a given year in reported data can result from a blend of several external factors that may not necessarily be obvious to a reader including such significant items as annual variations in operating budgets or capital budgets, policy revisions and one-time initiatives. Readers of this report should seek informed explanations respecting contributing factors before making judgments. Readers should not base judgments solely on the graphs and tables contained in this report. Readers should also consider the many other reports and published program information made available by the GN.

When viewing such comparative information, it is important to note that certain factors such as planned changes in the GN's priorities from year to year can impact the annual results. For instance, a significant level of capital projects in one year would likely reveal a high level of Public Tendering which is the typical approach when awarding large value major works projects. A reduction in major works projects the following year, however, could reveal a related decrease in Public Tenders by value which is not necessarily indicative of any change in approach in the government's procurement and contracting practices. Therefore it is important to consider the broader perspective and context before making conclusions when assessing the comparative information presented.

Each year there is a portion of contracting activities which relate directly to the GN's ongoing role in maintaining essential services and basic programs. Other contracting activities are closely aligned to the cyclical nature of the GN's capital spending commitments.

Major capital projects typically follow a period of planning which includes inception, planning and design phases prior to the period of intense construction activity starting. The following year would normally show a large reduction in contracting activity. Comparisons made across such years may reveal an unexpected change in the level of contracts which were competitively awarded as well as the relative percentage of contracting activities by type or method.

A year in which a number of large capital projects are entering their design phase would see an increase in the volume and value of spending activity on design contracts ("A/E"). Given that the design phases of capital projects are typically followed by construction, it would be logical to see corresponding increases in the number and value of major construction contracts awarded ("CON") in the following year.

Given that design and construction contracts are typically higher value contracts awarded through a public RFP or Tender method, whereas other types of contracts are typically of smaller value awarded through an invitational process; a significant decrease in the infrastructure contract values with no change in the other contract values could imply an increase in Invited Tenders or Proposals even though there is no real increase in those activities.

It is worthwhile to note that contract activities which relate to the GN's ongoing responsibility for maintaining basic services and safeguarding the health and welfare of Nunavummiut may warrant special measures to ensure prompt attention and immediate action. Depending on the nature, this may warrant engagement of expertise or necessary services outside the normal competitive process. This can occur where a delay would be injurious to the public interest, or where there is only one vendor available and qualified enough to perform the contract. Therefore in a year in which the level of capital spending is low, the proportion of non-competitively awarded contracts may appear high even though there has been no underlying change to the GN's procurement and contracting practices.

Readers are therefore cautioned from making specific conclusions upon reviewing the comparative information presented. As the GN's primary Contracting Authority, CGS continues to monitor and assess annual indicators, enhance services offered to clients and client departments, and review its contracting activities regularly to ensure best practices across the GN.

Sole Source Contract Observations

Sole Source contracting practices are monitored closely. The GN believes we get the best value for our money through competitive bidding processes, however, there are limited situations where the contracting regulations permit awarding contracts without competition. Section 3 of this report discusses the acceptable conditions for awarding contracts without competition.

The GN continues to review the contributing factors to contracts that have been Sole Sourced. CGS monitors the various types of contracts entered into without competition, and can offer strategic planning and other services to assist departments in decreasing their reliance on the Sole Sourcing methodology; especially where the permitted Sole Source criteria may not be met. For example, 'delay would be injurious to the public interest' is sometimes misunderstood, and the criterion 'there is only one party capable and available' is also sometimes relied upon without sufficient marketplace research or other appropriate data to support the request.

We will continue to work with departments towards reducing the occurrence of this contracting method. In 2010/11 Sole Source contracts, decreased in volume by 3.5% and increased in value by 10%. The number of Sole Source contracts are more prevalent in contracts with value under \$100,000.

Not Included in These Statistics

Note: The statistical numbers in this report do not include four (4) large categories of contracts. Those are:

	2008/09	2009/10	2010/11
1. Scheduled Medical Travel	\$32M (est.)	\$29M (est.)	\$32.5M (est.)
2. Fuel (PPD)	\$195M (est.)	\$140M (est.)	\$162.5M (est.)
3. Police and Laboratory Services	25M (est.)	\$26M (est.)	\$28.3M (est.)
4. Physician Services		\$16.8M (est.)	\$10.7M (est.)

These four high value categories total approximately \$234 million. Medical Travel, Fuel Resupply and Physician Services are the result of a competitive bidding process, Police and Laboratory Services is an extension of a previous contract with the RCMP. If we include these numbers, Sole Source contracts would value approximately 7.5% of total expenditures. Eliminating these numbers from statistical analysis allows for a more detailed and closer examination of Sole Source contracts.

Appendix A outlines the definitions of terms and abbreviations.

Appendix B entitled *Sole Source Listing* provides a listing of all Sole Sourced contracts by value (> \$5,000) in ascending order.

Appendix C entitled *Contract Detailed Listing* provides a listing of all contracts (> \$5,000) and is presented by Contract Type in ascending Award Value.

The intent of these appendices is to enhance transparency of GN contracting and procurement practices by presenting meaningful and useful information on a timely basis. A threshold of \$5,000 has been established to provide focus on higher value contracts.

The contract details presented in this report reflect information recorded at the time of contract issuance. Information such as the award value represents the upper limit of a contract as established and agreed by the parties. It should be noted that the disclosure of proprietary information is typically restricted as the release of same may prove harmful to private sector interests and could expose the GN to legal and financial claims. CGS continues to operate under the advice and direction provided by the Department of Justice in this regard.

Scheduled Medical Travel

The detailed lists in Appendix B and C do not include the value of Scheduled Medical Travel awarded by the Department of Health and Social Services in 2010/11. At the request of Members of the Legislative Assembly we are providing a breakdown of dollar amounts spent in each fiscal with each of the carriers for non emergency medical travel:

Airline	2008/09	2009/10	2010/11
Adlair Aviation 1983 Ltd.	\$20,835	\$19,169	
Air Canada			
Air Nunavut Ltd.	\$3,650		
Air Tindi	\$232,896		
Aqsaqniq Airways Ltd.		\$346,855	
Calm Air	\$5,348,978	\$5,139,406	\$5,791,842
Canadian North	\$8,340,345	\$7,418,274	\$8,433,973
First Air	\$11,645,227	\$9,954,146	\$10,633,638
Kivalliq Air Division of Keewatin Air	\$6,124,112	\$5,911,388	\$7,673,392
Keewatin Air Limited	\$112,446	\$375,620	
Kenn Borek Air Ltd.	\$1,212		
Unaalik Aviation (2004) Inc.	\$337,082	\$50,907	

The GN is in the process of awarding new Scheduled Medical Travel contracts and expenditures under these contracts will be reported the same way.

Fuel Re-supply

The following contracts were awarded for the fuel re-supply:

Company	2008/09	2009/10	2010/11
Aarruja Development Corporation		\$9,490	\$408,434
Aarruja & Arctic			
Air Nunavut	\$13,041		\$14,049
Air Tindi	\$95,735		\$19,013
Baffin Gas Bar		\$58,362	\$95,345
Buffalo Airways			\$15,212
First Air	\$1,672,543	\$408,726	
Imperial			
Iqaluit Gas Bar	\$345,031	\$7,873	
Kissarvik Coop			\$66,950
M&T Enterprises			
Midnight Petroleum	\$29,760	\$6,344	\$10,402
Northern Networks	\$108,670	\$553,281	\$102,229
NTCL	\$25,768,024	\$17,047,781	\$67,412
Nunavut Eastern Arctic Shipping	\$13,981	\$21,020	\$22,471
Nunavut Sealink		\$62,182	\$71,063
Unaalik Aviation			\$1,200
Woodwards	\$167,403,871	\$122,163,181	\$161,645,016

Contracts Awarded by Executive Council

The Standing Committee on Government Operations and Accountability has recommended that Government record and disclose contracts entered into by Executive Council in this annual report. Government is able to confirm that there were no contracts awarded by Executive Council for the reporting period.

General Observations

The following is a brief synopsis of the statistical analysis for the fiscal year 2010/11.

The actual **volume** of contracts (number of contracts issued) is up by 20% from 2008/09 and 2% from 2009/10.

The department with the largest **volume** of contracts is Health and Social Services (HSS) followed by Community and Government Services (CGS).

The actual **value** of contracts is up slightly from 2008/09 and up 14% from 2009/10. In 2010/11 Service Contracts represented the largest category (dollars spent) of all contracts (34%) followed by Construction Contracts (22%). For the year 2009/10 the largest category (dollars spent) was Construction (41%) followed by Service Contracts (38%).

In 2010/11 Service Contracts and Purchase Orders still represent the largest **volume** of contracts (81%).

The most common method of awarding contracts, by **volume**, is through Public and Invitational Tenders and RFP's (63%). This percentage was the same in 2009/10 and was 60% in 2008/09.

75% of the total **value** of all contracts is the result of some form of competitive bidding. As a proportion of all contracts, this represents an increase of 5% from the fiscal year 2009/10 and 14% since 2008/09.

The **volume** of Sole Sourced contracts has decreased by 3.5% from the fiscal year 2009/10 to 2010/11 and the **value** of Sole Sources increased by 10% over the same period.

In the Spring of 2009 the Hamlet of Pangnirtung experienced an unprecedented flooding which compromised critical road infrastructure. This emergency necessitated the Sole Sourcing of contracts for Goods and Services. If not for the emergency contracting provision of the government contracting regulations, CGS would not have been able to respond to the Pangnirtung emergency without delay. This illustrates the correct and appropriate application of the Sole Source criterion "delay would be injurious to the public interest" and is precisely why the regulations permit such a practical approach. In this report, a contract awarded under the emergency award provisions of the contracting regulations are identified as "SE" in Appendix C, and are included with the Sole Source (SS) figures in the tables in section 4 (Sole Source contract distribution).

Also, we can expect to see an increase in the volume and value in next year's Sole Sources due to the water emergency in the community of Arviat.

The contracting regulations also allow the Sole Sourcing of design services under \$25,000 (AE), and any other type of contract under \$5,000. This report does not analyse contracts under \$5,000, however A/E contracts under \$25,000 are identified as "SA" in Appendix C.

The final criterion in the contracting regulations where awarding contracts without competition is permitted, 'Sole Vendor' or 'only one qualified vendor is capable and available' is more difficult to quantify, and therefore applied with the most subjectivity. CGS recommends that the best way to substantiate availability of qualified contractors and consultants, is to go to the marketplace and request competitive bids. The values and volumes for these contracts are presented separately in the tables in section 4.

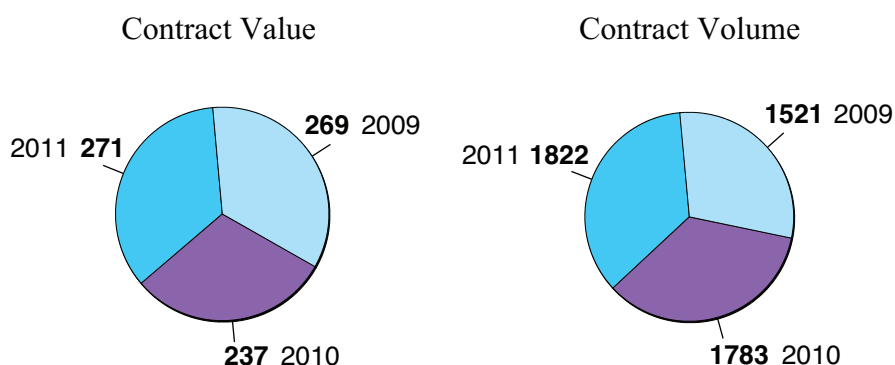

Over the last three years included in this report, the trend in Sole Source contracting has been decreasing in volume. Over the three years covered by this report the volume of Sole Source contracts is down by 9%. This decrease in volume on Sole Sourcing is the result of significant effort to emphasize the advantages of the competitive bidding process. Over the last four (4) years the decrease in volume is 28%.

Summary

1. All Contracts (> \$5,000)

The charts below “*Government of Nunavut Contracting Value*” summarizes the distribution of contracts awarded by value (or contract dollars) and volume (or quantity).

Government of Nunavut Contracting Value and Volume 3 Year Comparison

The *Procurement Activity Report* has been produced for the past eight fiscal years. The two charts above illustrate how the GN's contracting activities have changed over the past three years and are further supported by the details provided in the following table. In terms of contract value, the highest level of contracting activity occurred in the 2010/11 fiscal year. The contract value for 2010/11 shows an increase of 14% from 2009/10. In terms of volume, the number of contracts issued in 2010/11 represents a 2% increase compared to the number of contracts awarded the prior year.

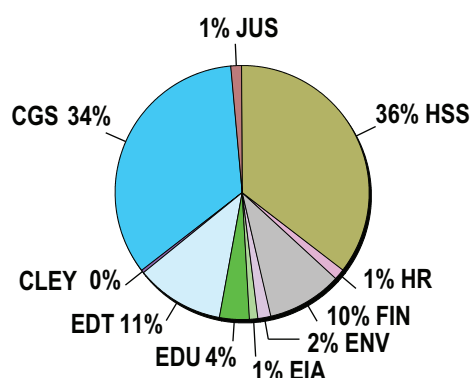

The following Average Contract Value table shows that the average contract value has increased by \$16,000 over the last fiscal year. An analysis of Appendix C compared to the charts presented in this report, and those from past fiscal years will indicate areas where spending increased or decreased. For instance, all contract types except construction have increased in total value.

All Contracts (Thousands)

Type	2010/11	2009/10	2008/09
Number of Contracts	1,822	1,783	1,521
Total Value	\$271,132	\$236,972	\$269,411
Avg Contract Value	\$149	\$133	\$177

The chart below “Government of Nunavut Department Distribution ~ Value” summarizes the distribution of contracts by department.

**Government of Nunavut
Department Distribution - Value
2010/11**

The chart above shows the level of contract activities each department engaged in during the 2010/11 fiscal year. Not surprisingly, those departments with responsibility for overseeing Nunavut’s infrastructure development, health, education and emergency services engaged in higher levels of contract activities. Services are often needed in order to address the needs of Nunavummiut, fulfill departmental mandates and meet client service expectations and needs.

Total Contract Distribution by Department ~

Department	2010/11		2009/10		2008/09	
Community and Government Services (CGS)	\$92,439	34%	\$82,842	35%	\$48,522	18%
Culture, Language, Elders and Youth (CLEY)	1,016	-	23,984	10	3,559	1
Economic Development and Transportation (EDT)	30,548	11	32,235	14	28,827	11
Education (EDU)	10,270	4	16,726	7	91,341	34
Executive and Intergovernmental Affairs (EIA)	2,873	1	1,753	1	1,042	-
Environment (ENV)	4,508	2	5,762	2	4,378	2
Finance (FIN)	25,823	10	5,136	2	5,528	2
Human Resources (HR)	3,808	1	2,982	1	3,320	1
Health and Social Services (HSS)	96,269	36	36,331	15	75,160	28
Justice (JUS)	3,578	1	29,221	12	7,734	3
Total	\$271,132	100%	\$236,972	100%	\$269,411	100%

In terms of annual comparisons, the Department of Economic Development and Transportation (ED&T) experienced an increase in contracting activities in 2009/10 compared to 2008/09, related primarily to maintaining and upgrading airport infrastructure. ED&T larger contracts represent Airport Operations and Community Aerodrome Radio Stations Operations

CGS is the primary contracting authority for construction and transportation which accounts for a large portion of AE and CON type contracts, and virtually all Air Charters (AC). CGS saw a large increase in 2009/10 due to an investment of \$10 million fuel upgrade in Rankin Inlet and a further \$7 million in Information Technology (IT) Services. In 2010/11, CGS contracted for IT infrastructure and other typical CGS contracts.

The Department of Justice funded significant contracts worth over \$3 million for Healing Facilities in Iqaluit and Rankin Inlet in 2008/09. In 2009/10 they funded over \$26 million for a correctional healing facility for the same Rankin Inlet project. In 2010/11 we see a return to normal operating levels.

The Department of CLEY invested \$21 million in a new learning facility in Clyde River in 2009/10. In 2010/11 we see a return to normal levels of contracting.

In terms of annual comparisons, in 2009/10 the Department of Culture, Language, Elders & Youth (CLEY) invested \$21 million in a new learning facility in Clyde River. In 2010/11 we see spending decrease to a normal level.

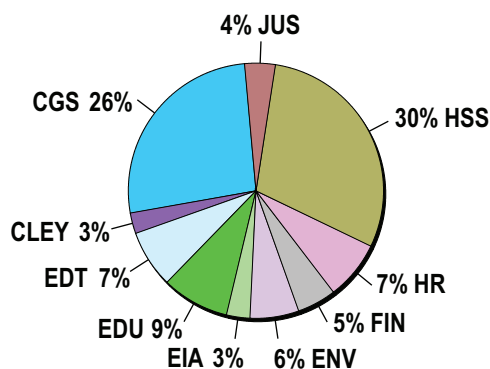

The Department of Finance (FIN) has seen a \$20 million dollar increase in contracting for the fiscal year 2010/11.

This is composed of \$15 million for employee benefits to Great West Life and close to \$3.5 million for infrastructure upgrades for the Strengthening Financial Management Initiative, (WAN, MAN, LAN).

The contracts for Health & Social Services (H&SS) are largely composed of specialized residential care.

The chart below “Government of Nunavut Department Distribution ~ Volume” illustrates the distribution of contracts by department.

**Government of Nunavut
Department Distribution - Volume
2010/11**

The Departments of Health and Social Services and Community and Government Services represent the highest level of contracting activity attributable to the specialized Goods and Services required to meet the needs of Nunavummiut.

Total Contract Distribution by Department – Volume

Department	2010/11		2009/10		2008/09	
Community and Government Services (CGS)	481	26%	473	27%	478	31%
Culture, Language, Elders and Youth (CLEY)	48	3	67	4	53	3
Economic Development and Transportation (EDT)	133	7	133	7	146	10
Education (EDU)	156	9	256	14	162	11
Executive and Intergovernmental Affairs (EIA)	54	3	25	1	29	2
Environment (ENV)	113	6	106	6	111	7
Finance (FIN)	90	5	70	4	75	5
Human Resources (HR)	136	7	137	8	108	7
Health and Social Services (HSS)	541	30	428	24	275	18
Justice (JUS)	70	4	88	5	84	6
Total	1,822	100%	1,783	100%	1,521	100%

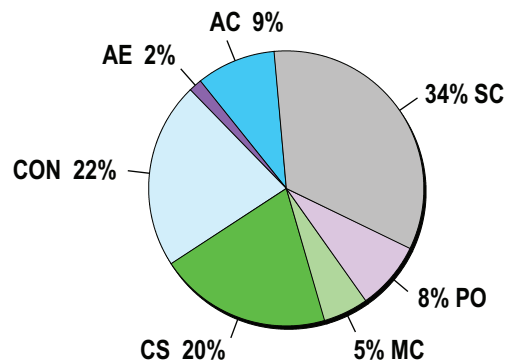

In 2010/11 the Department of EIA saw a large increase in the volume of contracts. These contracts are primarily composed of Communications and research/studies. For the Department of Health and Social Services, a majority of their contracts are composed of Specialized Residential Care services for individual clients.

Much of the increase in the volume of contracts for the Department of Finance is composed of infrastructure upgrades (installation of cabling) for Strengthening Financial Management initiative.

2. Contracting Types

The chart below “*Government of Nunavut Contracting Value*” summarizes the distribution of contract values by type.

**Government of Nunavut
Contracting Types - Value
2010/11**

When compared to 09/10, the value of the GN's contracting activities increased by 14%. (However the volume of contracts has increased by only 2.2%)

The pie chart above shows that the categories of contracts that represent the largest spend are Service and Construction contracts. Appendix "C" lists all contracts over \$5,000. In the Construction section we see five Construction projects over \$5 million. These projects include new arenas in Resolute Bay and Pond Inlet, Hamlet office in Taloyoak and Kugluktuk, sewage and solid waste improvements in Cambridge Bay, and a new air terminal building in Qikiqtarjuaq.

The volume of Service Contracts has increased by 46% from 2008/09 to 2009/10, however from 2009/10 to 2010/11 they remain consistent. A significant volume of the Service Contracts are for providing specialized residential care programs through the Department of Health and Social Services.

The value of Air Charter contracts increased significantly from 2009/10 to 2010/11. However, the volume remains fairly consistent over the last 3 years. The volume represents 6-7% of all contracts.

Contracting Types ~ Value
(Thousands)

Type	2010/11		2009/10		2008/09	
Air Charter (AC)	\$25,326	9%	\$3,514	1%	\$47,047	17%
Architectural/Engineering (AE)	4,167	2	3,777	2	11,188	4
Construction (CON)	59,494	22	97,820	41	111,589	41
Consulting services (CS)	54,993	20	10,744	5	17,248	6
Minor Construction or Maintenance Services (MC)	14,362	5	10,463	4	7,866	3
Purchase Orders (PO)	21,754	8	19,764	8	20,259	8
Service Contracts (SC)	91,036	34	90,889	38	54,214	20
Total	\$271,132	100%	\$236,971	100%	\$269,411	100%

Architectural/Engineering contracts increased in both volume and value from the 2009/10 to 2010/11 fiscal years. As a percentage of contract volume and value, this remains consistent over the three years.

Consulting Services has increased significantly in value in 2010/11 (There are approximately 35 million worth that should have been reported as SC). In 2009/10 service contracts increased significantly in value and volume and consulting contracts decreased. There is often confusion in reporting consulting and general service contracts. These values will likely continue to fluctuate over time.

Minor Construction and Maintenance contracts remain somewhat consistent while Major Construction activities appear to be slowing down. In 2009/10 there were 12 contracts worth over one million dollars and three worth over \$10 million. In 2010/11 there were no contracts worth over eight million.

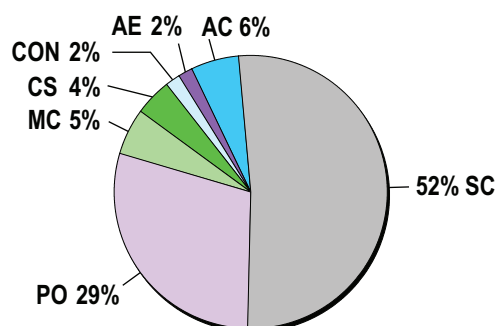

The value of purchase orders as a percentage of the total contracts value remains constant at 8%. This has been the trend for the past three years.

For the year 2008/09, the value of Service Contracts settled at just over \$54 million. As was mentioned previously medevac contracts are now more accurately reported in the Air Charter category. Service Contracts for 2009/10 show an increase of over 67%. For the 2009/10 fiscal year, the volume and value of Service Contracts increased (by 46% and 68% respectively). Specialized and residential care and airport operations and maintenance continue to represent a large portion of the SC value.

As was previously mentioned, approximately \$35 million in contracts were reported under consulting services which should have been reported as service contracts. This includes such large contracts as operator services for group homes, operators for corrections camp facilities, and employee benefits. The value of service contracts actually shows an increase from 35-40% from 2009/10 to 2010/11.

The chart below “Government of Nunavut Contracting Types ~ Volume” illustrates the distribution of contracts by award method.

**Government of Nunavut
Contracting Types - Volume
2010/11**

Contracting Types - Volume

Type	2010/11		2009/10		2008/09	
Air Charter (AC)	104	6%	114	6%	106	7%
Architectural/Engineering (AE)	31	2	22	1	27	2
Construction (CON)	32	2	30	2	33	2
Consulting services (CS)	80	4	89	5	94	6
Minor Construction or Maintenance Services (MC)	100	5	84	5	73	5
Purchase Orders (PO)	532	29	497	28	539	35
Service Contracts (SC)	943	52	947	53	649	43
Total	1,822	100%	1,783	100%	1,521	100%

In 2009/10, the volume of Air Charters increased by 8%. In 2009/10, the H1N1 vaccination program required six Air Charters worth approximately \$155,000. The volume of Air Charters remains relatively consistent at 6-7% over the three years. However, the value of Air Charters fluctuates greatly.

For the fiscal year 2009/10, the volume of Construction contracts decreased slightly from 2008/09 (down by 9%). Of these 30 contracts, 2 were over \$20 million. 16 of them were under 1 million, 10 were under 5 million and 2 were over 5 million. CGS publicly tendered Piquisilirvvik Inuit Culture Learning Facility and the New Men's Correctional Healing Facility in Rankin Inlet on behalf of the Departments of CLEY and Justice (a combined value of \$48,445,000.00). When fewer design contracts are being awarded (AE), we can expect to see fewer Construction awards in the next fiscal year.

In 2010/11, we see a 41% increase in the volume of AE contracts awarded. We may anticipate that in the next year we may see an increase in the volume and value of construction contracts.

Some of the larger construction contracts awarded through public tender include two new arenas (Pond Inlet, Resolute Bay) and two hamlet offices (Taloyoak, Kugluktuk), and a new Air Terminal Building for Qikiqtarjuaq.

Service Contracts increased significantly for the fiscal year 2009/10. The table shows a 46% increase in service contract volume.

A large volume of Service Contracts are for categories such as specialized residential care for the Department of Health and Social Services, employee relocation moving services, specialized training programs and airport operations agreements with several Nunavut Hamlets. In 2010/11 the volume of service contracts has remained relatively stable.

Major works Construction volume has been relatively consistent at between 30-33 projects per year over the last three years.

The volume of consulting services contracts should be approximately 17 fewer than is reported due to reporting errors. This volume of 63 indicates a trend towards fewer contracts for consulting services over the last three years.

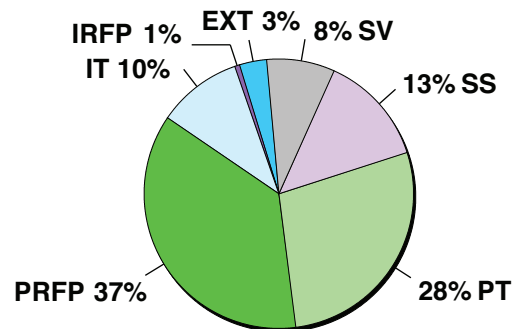

The value of Service Contracts have not significantly increased from 2009/10, and the volume has actually decreased slightly.

The tables show a significant increase in Consulting Contracts from 2009/10 to 2010/11: over 400% in value and 10% in volume. Of the large value Consultant contracts in appendix "C", 4 are worth \$3 million and higher (the highest one being approximately \$15.5 million). These contracts are not standardized consulting or general services and are often difficult to categorize for this report. CG&S will work with departments to address this reporting anomaly.

3. Contracting Methods

The chart below “*Government of Nunavut Contracting Methods ~ Value*” summarizes the distribution of contracting method by value.

Government of Nunavut
Contracting Methods - Value
2010/11

Competitive tenders and proposals continue to represent the most significant contracting method employed by the GN. The GN believes that best value is received for goods & services through the competitive tender process.

Over the last four years of this report, 07/08, 08/09 and 09/10, the value of competitively tendered contracts has been increasing steadily, 52%, 62% and 70% respectively. In 2010/11 the trend continues with 76% competitively tendered. The percentage value of Sole Source contracts has been consistently decreasing 25%, 17% and 14% for the past three years 07/08, 08/09 and 09/10. In 2010/11 the trend continues as the percentage of value of SS contracts is 13%.

As in most jurisdictions, the awarding of contracts on a non-competitive basis is understandably limited to specific situations and must be appropriately justified and approved. Sole Source (SS) and Sole Vendor (SV) contract values are on average 22% of total contracts values and they represent 34% of contract volume.

Compared to other award methods, the values for Invitational Tenders and RFPs appears small because contracts under \$25,000 and Construction under \$100,000 are awarded through an invitational process. Contracts of a higher value must be awarded through a public process, therefore values for Public Tender and RFP are higher.

The Request for Proposals process is generally recommended to enter into Consultant and Service Contracts.

Contracting Methods - Value (Thousands)

Method	2010/11		2009/10		2008/09	
Extensions (EXT)	\$9,021	3%	\$14,627	6%	\$42,086	16%
Invitational RFP (IRFP)	1,605	1	3,285	1	1,901	1
Invitational Tender (IT)	27,530	10	7,492	3	10,355	4
Public RFP (PRFP)	99,110	37	40,972	17	27,270	10
Public Tender (PT)	75,752	28	115,116	49	126,390	47
Sole Source (SS)	36,090	13	32,677	14	46,672	17
Sole Supplier or Vendor (SV)	22,024	8	22,803	10	14,737	5
Total	\$271,132	100%	\$236,972	100%	\$269,411	100%

In 2009/10 the contracting method of Public RFP (PRFP) had seen a 50% increase in value. In 2010/11 the same method has seen an increase of 147%.

97% of the value of Air Charters and 94% of the volume of Air Charters were competitively awarded.

71% of the AE contract value and 81% of the AE volume was awarded through a competitive process.

100% of the value and volume of Construction contracts were competitively tendered.

93% of the value and 81% of the volume consulting contracts were competitively awarded. Of the value of consultant contracts that were Sole Sourced 89 % was for contracts over \$100,000. Of the volume of consultant contracts not competitively awarded, 69% were for contracts under \$100,000. There is a higher volume of low value consultant contracts being Sole Sourced and a lower volume of high value contracts.

90% of the value and 91% of the volume of Minor Construction and Maintenance contracts were competitively tendered. This is down from 94% and 97% respectively in 2009/10. 74% of the value and 65% of the volume of non-competitively awarded Minor Construction or Maintenance contracts are actually extensions of multi-year maintenance contracts awarded in previous fiscal years.

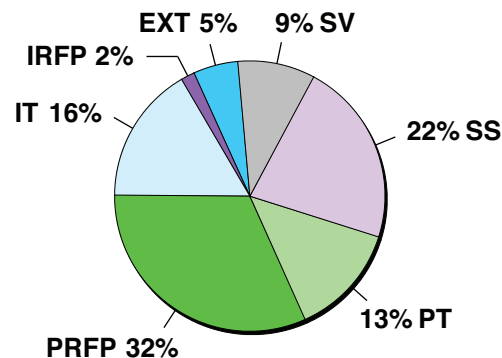

69% of the value and 85% of the volume of goods were purchased through a competitive process. Of the 31% of PO value Sole Sourced, 83% of the volume and 21% of the value were for POs under \$100,000. The remaining 17% of volume and 79% of value were for Purchase Orders over \$100,000. As the value of Purchase Orders increases the sole sourcing award method decreases.

40% of the value and 35% of the volume of Service Contracts were competitively awarded. Of the 54% of value Sole Sourced , 74% was for contracts over \$100,000.

Of the 54% of value of Sole Sourced Consulting contracts 21% was for contracts under \$25,000. 4% was for contracts \$25,000 up to and including \$100,000 and 74% was for contracts over \$100,000. The remaining contracts were extensions from previous years; 1% of value and 3% of volume of all consulting contracts. 65% of the value and 25% of the volume of extended contracts were in excess of \$100,000. As the dollar value increases, the volume of Sole Sources decreases.

The chart below “*Government of Nunavut Contracting Methods ~ Volume*” illustrates the distribution of contracting methodology.

**Government of Nunavut
Contracting Methods - Volume
2010/11**

Over the last three years, from 2008/09 to 2010/11 we see a general increase in the volume of competitive bidding particularly in Public Tenders and RFPs. In 2008/09 60% of the volume of procurement processes were from competitive processes. In 2010/11 it is at 63%. Note that in some circumstances, extensions of contracts may be considered competitive process if they were originally part of a competitive process. Therefore not all extensions are non-competitive.

It is worthwhile to note that more departments are using the services of CGS Purchasing, Logistics and Contract Support to award their contracts through a competitive Tender or RFP process. CGS's Procurement, Logistics and Contract Support Services section continues to work with departments to decrease the use of Sole Source criteria to award contracts

Contracting Methods ~ Volume

Method	2010/11		2009/10		2008/09	
Extensions (EXT)	98	5%	72	4%	25	2%
Invitational RFP (IRFP)	30	2	34	2	28	2
Invitational Tender (IT)	300	16	322	18	336	22
Public RFP (PRFP)	580	32	546	31	351	23
Public Tender (PT)	244	13	212	12	205	13
Sole Source (SS)	402	22	416	23	437	29
Sole Supplier or Vendor (SV)	168	9	181	10	139	9
Total	1,822	100%	1,783	100%	1,521	100%

Over the last three years, the GN accomplished a 25% increase in volume of awarding contracts through a competitive process. This represents an increase of 23% in the value of contracts competitively awarded. Overall, the greatest increases are in public requests for proposals (volume and value).

The Pangnirtung emergency of 2008/09 represents a proper use of Sole Source contracting method. This emergency was not predictable. Sole Source contracts were necessary for Goods and Services to avoid public harm and continue to deliver vital services to the residents of Pangnirtung.

In 2009/10, the community of Igloolik experienced an emergency resupply pipeline upgrade. This emergency contract was for \$501,000. Other examples of Sole Source emergencies in 2009/10 include Ice Rescue North Pole Exhibition, various search and rescue efforts, contaminated soil removal at Sakku school, etc. .

The Sole Source methods are of most concern (Sole Vendors will always exist). Senior Managers and Directors need to continue to be more conscious of this and plan to avoid Sole Source contracts where possible. GN Procurement Guidelines as well as the FAA (Financial Administration Act) clearly define the acceptable conditions for Sole Sourcing. Sole Sourcing is a tool for dealing with emergency situations and public safety.

The next section of this report discusses the GN's Sole Sourcing activities in further detail. A detailed review of Appendix B will indicate where GN departments are using Sole Sourcing to assist them with implementing their mandates.

While the volume of Sole Sources appears to be decreasing over the last three years, the value of Sole Vendor contracts continues to fluctuate; in 2010/11 the volume decreased by 7% from 2009/10, but it is up by 21% from 2008/09.

4. Sole Source Contract Distribution

As a procurement section, we strive to get the maximum value for the Government of Nunavut. This is only possible through the competitive, public bidding process. GN procurement guidelines as well as the Government Contract Regulations set out the acceptable conditions for Sole Sourcing. Procurement guidelines explain the GN contracting regulations and provides restrictions for when a contract can be awarded without competition.

Sole Source contracting is allowed where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (a) the Goods, services or Construction are urgently required and delay would be injurious to the public interest; or
- (b) only one party is available and capable of performing the contract; or
- (c) the contract is an architectural or engineering contract that will not exceed \$25,000, or the contract is any type of contract that will not exceed \$5,000 in value.

Section 10. (c) of the regulations is the easiest to implement because it requires only a 'yes/no' answer. Is the contract over \$5,000? If not, it does not fall within the 'under \$5,000 criterion'. Is it a contract for Architectural/Engineering Services under \$25,000? If not, then it does not fall within the 'AE under \$25,000' criterion.

Sections 10 (a) and (b) of the regulations, however, are more difficult to implement because they are subject to interpretation of what constitutes 'public injury' or 'capable and available'.

Section 10 (a) of the regulations can be somewhat tricky in that many contracting authorities believe that public well being, in addition to health and safety, are legitimate factors to consider when deciding not to go to competition. For example, it may be more beneficial to a community to Sole Source or Invite Tenders for Major Works contracts rather than Publicly Tender, when missing sealift can sometimes delay final delivery of a facility for 2 full years. In some cases, this may be a reasonable approach. However, it should not be the only alternative if project schedules fall behind due to a lack of strategic planning and project coordination. Where there is a true emergency, such as the Pangnirtung flood and bridge collapse or search and rescue operation, it is quite easy to recognize, and reasonable to implement. In a true emergency, there is no time for a competitive procurement process.

In some situations it is not advisable to issue a competitive call for tenders or proposals, by invitation or advertisement. In these situations, the delay caused by the tender or RFP process would be harmful to person(s) or end users of the good or service. These are emergency situations where if the government doesn't act immediately, there will be some form of public harm or injury. For example, sections of a roof have blown off a school or nursing station or other public building; contaminants are spilling into potable water, a fuel delivery truck requires repairs, etc. This is not to say that all emergencies or public harm is strictly a health and safety hazard. Indeed, many situations call for government action to improve the emotional health and well being of the public as well.

Section 10(b) of the regulations on the other hand, can be especially difficult to manage as it is open to wider interpretation and, therefore, susceptible to much broader use. There are many circumstances, however, that do legitimately fall within the s.10(b) criterion, and these are true “Sole Vendor” situations. Situations involving licenses, software maintenance, patents and intellectual property or the purchase of a part component for equipment (such as a valve or pump to repair a fuel delivery truck or fire engine, or plow parts for snow clearing equipment). Situations that do not warrant a competitive process, because there are no other manufacturers or suppliers of the specific product, are true Sole Vendor circumstances. For instance, NorthwesTel is the Sole Vendor of land-line telephone services in Nunavut; QEC is the Sole Vendor of electricity. These are situations where there truly are no other service providers.

This is not to say that a ‘Sole Vendor’ situation applies when purchasing many commodities. In fact, when purchasing vehicles and or other products such as photocopiers and fax machines, etc., the GN must avoid the use of brand specific names. Requests for Tenders and Proposals must always indicate that the GN will accept bids for similar or equivalent products so long as they meet the quality and functional requirements that are established in the request.

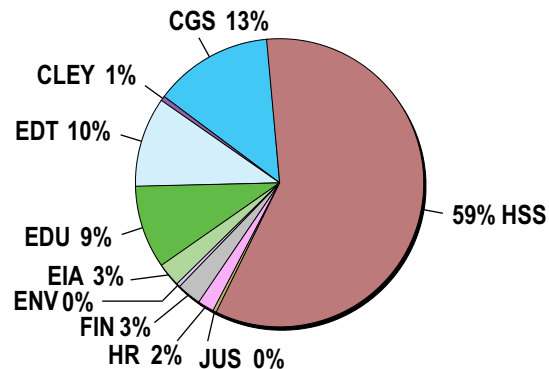

In some cases, it may be perceived by departments to be reasonable to rely on this clause to maintain delivery of critical programs and services at levels expected by the public or internal client departments (specialized professional services, for example., such as licenses, medical professionals and services). In many cases, departments need to bring in specialized skill sets to design programs to meet responsibilities owed to the public, and oversee that program’s delivery. Sometimes, departments simply need to keep up with demand in delivering basic services to internal clients. In this situation, the interpretation of ‘only one party capable and available’ can be too broad, and the criterion is likely being relied upon for convenience in lieu of a lengthy and complex RFP process.

The GN believes that best value is received for public dollars through open, fair and transparent competitive procurement processes. Furthermore, CGS believes that the best way to determine a supplier’s qualifications, availability and value is to seek their proposals on solution, implementation and price, and also evaluate their past experience and qualifications against defined and measurable standards.

The public’s satisfaction with a department’s performance and service levels, in any given program at any given time, will always be an indicator of good value for public money. In all cases where a department is considering entering into a contract under s.10(b) of the contracting regulations, CGS Purchasing, Logistics & Contracts Support is available to provide assistance on alternative contracting approaches. Where departments have already entered into s.10(b) contracts, Purchasing recommends referring to the Personal Service Contracts directive for further guidelines.

The chart below “*Government of Nunavut Sole Source Contract Distribution ~ Value*” summarizes the distribution of contracting method by department.

**Government of Nunavut
Sole Source Contract Distribution - Value
2010/11**

It should be noted that certain functions and responsibilities that are unique to certain departments lead to a higher propensity for this contracting method. Emergency situations with health and safety considerations or search and rescue may produce a need to enter into a contract quickly or limit alternatives or options for supply sources. Urgent situations involving the delivery of capital projects in the environmentally sensitive areas of sewage treatment, solid waste management, fuel spills and potable water have been contributing factors for Sole Source contracts on occasion. The arctic environment and a short Construction season serve to complicate project delivery and contracting options. Good planning and project management practices help to alleviate the necessity to rely on Sole Sourcing.

The volume (quantity) of Sole Sourced contracts and the total value (contract award value) of Sole Source contracts has consistently decreased for the last three fiscal years. The decrease is roughly 15% in volume and 3% in value from 2007/08 to 2009/2010.

In 2010/11 the volume of Sole Source contracts continues to decline however the value of Sole Source contracts increased by 10%.

Value of Competitively Awarded Contracts

07/08	08/09	09/10	10/11
52%	62%	70%	75%

Value of Sole Source Contracts

07/08	08/09	09/10	10/11
25%	17%	14%	13%

Volume of Competitively Awarded Contracts

07/08	08/09	09/10	10/11
59%	60%	63%	66%

Volume of Sole Source Contracts

07/08	08/09	09/10	10/11
36%	29%	23%	22%

In 2008/09 the departments which had the highest value and volume of Sole Sourced contracts were the Departments of Health and Social Services and Community & Government Services. Each of these departments have responsibilities for providing essential basic services which may impact the prevalence and frequency of this form of contracting method on occasion. In 2010/11 the departments of Health and Social Services and Community and Government Services had the highest value of Sole Source contracts. However, the highest volumes of Sole Source contracts were Health and Social Services and the Department of Education.

Note that the Sole Vendor and extensions are awarded without competition and they are not included in Appendix A. Extensions are a continuation of previously awarded contracts where the terms and conditions allow for the contract to be extended.

Sole Source Contract Distribution ~ Value (Thousands)

Department	2010/11		2009/10		2008/09	
Community and Government Services (CGS)	\$4,831	13%	\$5,533	17%	\$10,083	22%
Culture, Language, Elders and Youth (CLEY)	193	1	419	1	421	1
Economic Development and Transportation (EDT)	3,634	10	901	3	838	2
Education (EDU)	3,368	9	5,338	16	2,720	6
Executive and Intergovernmental Affairs (EIA)	956	3	272	1	635	1
Environment (ENV)	154	-	525	2	493	1
Finance (FIN)	990	3	749	2	2,706	6
Human Resources (HR)	655	2	652	2	515	1
Justice (JUS)	145	-	337	1	213	-
Health and Social Services (HSS)	21,165	59	17,951	55	28,050	60
Total	\$36,091	100%	\$32,677	100%	\$46,674	100%

A significant number of Sole Source contracts for the Department of Health and Social Services were for providing specialized residential care. This accounted for 86 Sole Source contracts and \$16.5 million, in 2008/09. This trend still continues. However in 2010 CGS and HSS initiated a Request for Proposal process that will eliminate many of these Sole Source contracts.

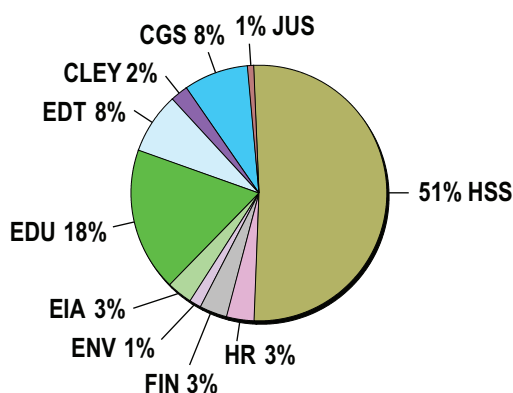

The department of Community & Government Services (CGS) has the third highest number of Sole Source contracts and the second highest value. CGS is responsible for delivering many of the basic services of Nunavummiut (water, sewage, fire protection, etc.). In the event of emergencies, CGS plays a major role in delivering solutions. In these emergencies, Sole Source contracts are expected. These emergencies usually involve issues with infrastructure such as water and sewage or search and rescue operations.

It is worthwhile to note that CGS responded to a number of emergencies in the territory last year including Cambridge Bay (water intake dredging and water line repairs), Sanikiluaq (pumping station), Kugaaruk (water treatment plant), and various search and rescue operations. CGS was able to immediately and practically respond to all these emergencies due to the emergency contract provision of the GN contracting regulations. CGS was also able to quickly replenish depleted fuel supplies in some Nunavut communities due to the GN contracting regulations emergency sole source provisions.

Community and Government Services has decreased both the value and volume of Sole Source contracts significantly in 2009/10 and again in 2010/11. The value of Sole Source contracts has decreased by 60% and the volume down by 67% since 2008/09.

The chart below “Government of Nunavut Sole Source Contract Distribution ~ Volume” illustrates the distribution of contracting methodology.

**Government of Nunavut
Sole Source Contract Distribution - Volume
2010/11**

On a proportionate basis, the Department of Health and Social Services issued the largest number of Sole Source contracts, followed by the Department of Education.

Sole Source Contract Distribution ~ Volume

Department	2010/11		2009/10		2008/09	
Community and Government Services (CGS)	33	8%	38	9%	100	23%
Culture, Language, Elders and Youth (CLEY)	9	2	9	2	11	3
Economic Development and Transportation (EDT)	31	8	16	4	13	3
Education (EDU)	73	18	92	22	73	17
Executive and Intergovernmental Affairs (EIA)	13	3	11	3	20	5
Environment (ENV)	6	1	6	1	4	1
Finance (FIN)	14	3	11	3	14	3
Human Resources (HR)	14	3	10	2	7	2
Health and Social Services (HSS)	206	51	215	52	186	43
Justice (JUS)	3	1	8	2	9	2
Total	402	100%	416	100%	437	100%

The volume of Sole Source contracts has decreased for all departments except for the Departments of EDT (94% increase, Finance (21% increase), Human Resources (40% increase), and Executive & Intergovernmental Affairs (EIA) which saw a small increase. This does not reflect an increase in EIA's percentage of contract share however. The same is true for the Department of Finance.

A department cannot truly know if there is only one qualified supplier available if it does not consult the marketplace through a competitive process. GN Departments need to continue to work toward reducing the occurrence of Sole Source contracts. The GN believes that best value is received for public dollars through open, fair and transparent competitive procurement processes.

Appendix A

Definition of Terms and Abbreviations

Terms

“Goods”: In this report, “Goods” means contracts for the purchase of Goods that are primarily entered into by *Procurement, Logistics and Contract Support Services* on behalf of Government of Nunavut departments, generally referred to as Purchase Orders.

“Invitation”: An Invitation is a contracting method where Tender or Request for Proposal documents are sent only to contractors or suppliers specifically selected to submit tenders or proposals.

“Invitational Tender”: An Invitational Tender (IT) are those requests for which tender documents are sent only to contractors or suppliers specifically selected to submit tenders. For readers not familiar with GN contracting practices, please note that outside Nunavut, Invitational Tenders are generally referred to as Solicited Tenders.

“Invitational Request For Proposal”: An Invitational Request for Proposal (IRFP) are those requests which are sent to contractors or suppliers selected to submit proposals.

“Purchase Orders”: In this report, “Purchase Orders” means contracts for purchase of Goods, primarily entered into by the Department of Community and Government Services on behalf of Government of Nunavut departments.

“Public Tender”: A Public Tender are those tenders which are publicly advertised. For readers not familiar with GN contracting practices, please note that outside Nunavut, Public Tenders are generally referred to as Invitational Tenders.

“Request For Proposal”: An Request For Proposal (RFP) has been defined as follows, “when the government knows what end result should be, but not necessarily how best to achieve it; therefore Government seeks *proposals* on methods, ability, and price”.

“Sole Source”: A Sole Source is best defined by setting out the criteria. The Government of Nunavut contract regulations, under the Financial Administration Act, allow Sole Sourcing of contracts where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (a) the Goods, services or Construction are urgently required and delay would be injurious to the public interest; or
- (b) only one party is available and capable of performing the contract; or
- (c) the contract is an architectural or engineering contract that will not exceed \$25,000; or
- (d) the contract is any type of contract that will not exceed \$5,000 in value.

“Tender”: Tenders may be obtained by public advertisement or private invitation. It should be noted that, generally, the value and type of contract will determine the type of tendering to be used.
