Purpose

The purpose of this document is to support integrity and transparency in the Government of Nunavut (GN) Contracting & Procurement Practices through annual reporting.

Please note:

The GN has introduced changes to the Procurement & Contracting Report for 2004-05 as part of its ongoing efforts to improve reporting and enhance transparency and accountability. These changes include:

- the inclusion of prior year comparisons, wherever possible; and
 - the introduction of a \$5,000 threshold for reporting purposes
- and are consistent with recommendations provided by Members with respect to the 2004-05 Report. The 2004-05 Report is more streamlined and provides greater focus on higher value items. As government implements new management information systems we anticipate that we will be able to incorporate data on contracts that are entered into as multi-year contracts.

Introduction

The GN's Procurement & Contracting Report was prepared by the Department of Community and Government Services (CGS).

The report presents statistical information and contract detail about GN contracts reported by GN Departments to CGS's *Procurement & Contract Support Services*.

It should be noted that contracts entered into by the GN Crown Agencies and Legislative Assembly are not reported to CGS and are not included in this report.

Contract information in this report is for contracts awarded and reported during fiscal year 2004-2005. CGS can not guarantee the accuracy of contract information reported by Departments, however, CGS makes best efforts to verify the information and ensure Departments are fully aware of the reporting requirements set out in the applicable GN policies and GN Contract Procedures Manual.

Report Overview

This report focuses on the distribution of contracts awarded to companies, individuals and organizations.

Charts and graphs are used to illustrate the statistics presented.

Appendix B entitled *Sole Source Report*, sets out the total Award Value of Sole Sourced Contracts and is presented alphabetically by GN Department.

Appendix C, entitled *Contract Detailed Report*, provides a listing of all contracts (greater than \$5,000) and is presented by Contract Type and Award Value.

The intent of these appendices is to enhance transparency of GN Contracting & Procurement Practices by presenting meaningful and useful information on a timely basis. A threshold of \$5,000 has been established to provide focus on higher value contracts.

The contract details presented in this report reflect information recorded at the time of contract issuance. Information such as the “contract value” represents the upper limit of a contract as established and agreed by the parties. It should be noted that disclosure of proprietary information is typically restricted on the basis that the release of same may expose the GN to vendor claims if harm can be proven.

Summary

1. Contract Volume & Value

In 2004-05, there were 758 contracts totaling \$82,321,459.45. This represents contracts issued during the year which exceeded an award value of \$5,000. This compares with 930 such contracts issued in 2003-04 for a total of \$110,938,910.50.

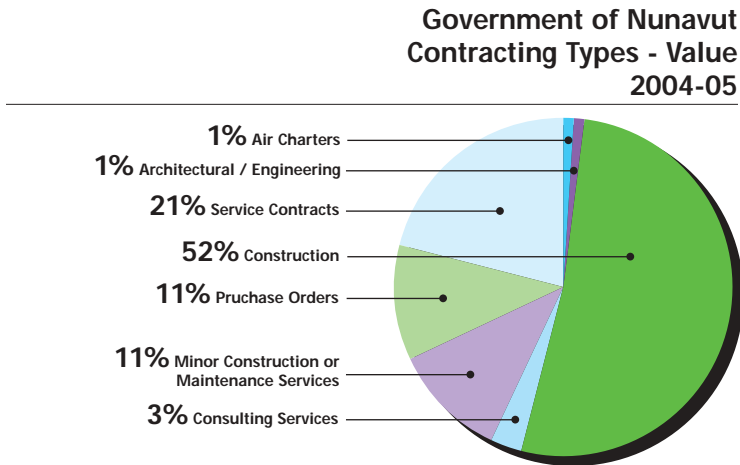

The number of contracts issued has decreased by 18.5% while the value of the contracts issued has decreased by over 25%, meaning that the average value of contracts issued has also decreased from 2003-04 to 2004-05.

The contract information in the Procurement and Contracting Report is presented on a comparative basis for fiscal year 2004-05 and 2003-04. In order to maintain relevance of the comparative data, the contract information for fiscal year 2003-04 has been restated from the 2003-04 Report to conform with changes incorporated in the 2004-05 Report.

2. Contracting Types

The chart below entitled “Government of Nunavut Contracting Types ~ Values” summarizes the distribution of contracting types by value.

Construction contracts represent the majority of the GN’s contracting activities based on value. This was consistent for both reporting years, 2004-05 and 2003-04. As well, purchase orders issued for the acquisition of goods needed to run government operations and provide programs and services remained at 11% year over year. Consulting services remained steady between 2 to 3%. Most notably, however, service contracts increased to 21% from 8% in the prior year. A significant portion of this increase relates to large value contracts issued by Health & Social Services in 2004-05.

Contracting Types

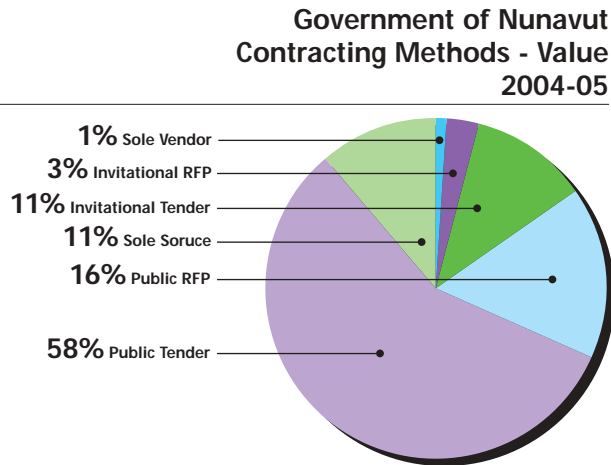

Type	2004-05 Value	%	2003-04 Value	%
Air Charter	1,165,000	1%	4,289,000	4%
Architectural / Engineering	731,000	1%	4,381,000	4%
Construction	42,493,000	52%	74,585,000	67%
Consulting Services	2,282,000	3%	1,952,000	2%
Minor Construction or Maintenance Services	9,137,000	11%	4,309,000	4%
Purchase Orders	9,122,000	11%	12,723,000	11%
Service Contracts	17,391,000	21%	8,700,000	8%
Total	82,321,000	100%	110,939,000	100%

*1: Decrease for Construction is attributable to the unique impact upon Contract Reporting of the Development Agreement Approach for Construction of the Hospital Expansion (\$55M).

3. Contracting Methods

The chart below “Government of Nunavut Contracting Methods ~ Value” summarizes the distribution of contracting method by value.

Public Tenders continue to represent the most significant contracting method employed by the GN. In fact, in combination with public RFPs, the percentage of requests that were broadly distributed remained steady at 75% for both 2005-04 and 2004-03.

As in most jurisdictions, the awarding of contracts on a non-competitive basis is understandably limited to specific situations and otherwise must be appropriately justified. In 2004-05, the GN's awarding of contracts under sole source and sole vendor arrangements actually

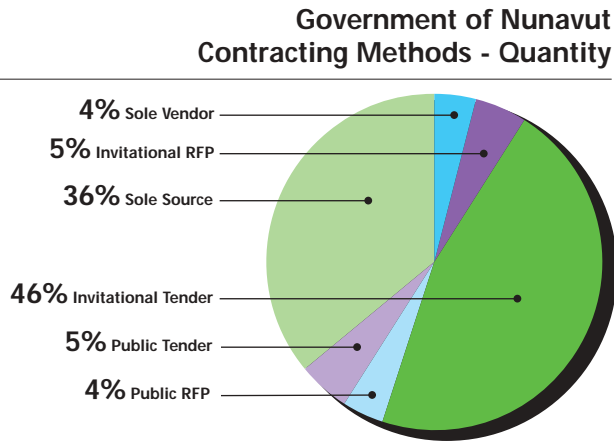

decreased slightly from the prior year; whereas a slight increase was noted on awards made on an invitational basis.

Contracting Methods ~ Value

Type	2004-05 Value	%	2003-04 Value	%
Invitational RFP	2,269,000	3%	1,691,000	2%
Invitational Tender	9,436,000	11%	10,234,000	9%
Public RFP	13,138,000	16%	5,870,000	5%
Public Tender	48,228,000	59%	77,725,000	70%
Sole Source	8,780,000	11%	13,745,000	12%
Sole Vendor	470,000	1%	1,674,000	2%
Total	82,321,000	100%	110,939,000	100%

The chart below entitled “Government of Nunavut Contracting Methods ~ Quantity” illustrates the distribution of contracting methodology.

On a proportionate basis, invitational tenders remain consistent both 2004-05 and 2003-04 with approximately 45% of contracts awarded from invitational tenders. Most notably, it appears that sole source contracts have increased proportionately since the prior year but in terms of actual numbers, slightly fewer contracts were awarded through sole source arrangements in 2004-05 and significantly less through a sole vendor basis in the same year. The average contract value has also declined since 2003-04.

Contracting Methods ~ Methods

Type	2004-05 Value	%	2003-04 Quantity	%
Invitational RFP	38	5%	24	3%
Invitational Tender	350	46%	422	45%
Public RFP	34	4%	36	4%
Public Tender	35	5%	83	9%
Sole Source	272	36%	287	31%
Sole Vendor	29	4%	78	8%
Total	758	100%	930	100%

Typically there are programming reasons pertaining to a department’s mandate and area of responsibilities, which impact contracting methods and have implications on departmental contracting practices.

For example, line departments that deliver programs, contract for goods and services in the normal course of their program operations more frequently than departments which have central agency responsibilities and serve internal needs of government.

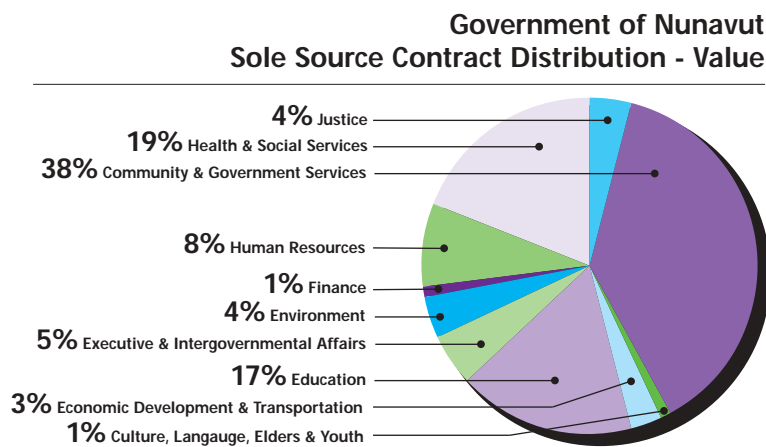

Departments with large program budgets, overall, issue a greater number of contracts annually, and as one would expect tend to greater numbers of sole source contracts.

4. Sole Source Contract Distribution

The chart below entitled “Government of Nunavut Sole Source Contract Distribution ~ Value” summarizes the distribution of contracting by department.

It should be noted that certain functions and responsibilities that are unique to certain departments lead to prevalence and a higher propensity and reliance on both frequency and quantity of this contracting methodology. Emergency situations with health and safety considerations or search and rescue may produce a need to enter into a contract quickly or limit alternatives or options for supply sources. Urgent situations involving the delivery of capital projects in the environmentally sensitive areas of sewage treatment, solid waste management and potable water have been contributing factors for sole source contracts on occasion. The arctic environment and a short construction season serve to complicate project delivery and contracting options.

The three departments which have the highest volume of sole source contracts (both in terms of value and quantity) are Health & Social Services, Community & Government Services and Education. Each of these departments have responsibilities for providing essential basic services which, as mentioned previously, may impact the prevalence and frequency of this form of contracting method on occasion.

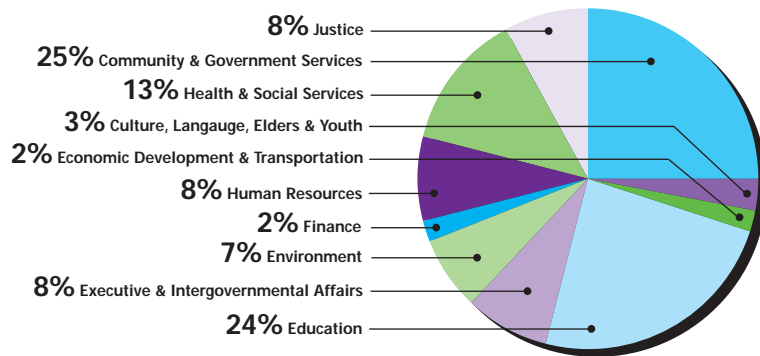

Please note:
Prior year comparatives have not been provided due to the shift in program responsibilities affecting certain departments in 2003-04 and therefore impacting how this information was recorded and limits comparability between years.

Sole Source Contract Distribution ~ Value & Quantity

Department	2004-05 Value	%	2004-05 Quantity	%
Community & Government Services	3,284,000	38%	71	25%
Culture, Language, Elders & Youth	121,000	1%	8	3%
Economic Development & Transportation	283,000	3%	6	2%
Education	1,527,000	17%	65	24%
Executive & Intergovernmental Affairs	428,000	5%	22	8%
Environment	349,000	4%	18	7%
Finance	131,000	1%	5	2%
Human Resources	686,000	8%	21	8%
Health & Social Services	1,583,000	19%	34	13%
Justice	388,000	4%	22	8%
Total	8,780,000	100%	272	100%

**Government of Nunavut
Sole Source Contract Distribution - Quantity**

Appendix A: Definition of Terms and Abbreviations

Terms

“Goods”: In this report, “Goods” means contracts for the purchase of goods that are primarily entered into by *Procurement & Contract Support Services* on behalf of Government of Nunavut departments, generally referred to as Purchase Orders.

“Invitational Tender or RFP”: An Invitation is a contracting method where tender or RFP documents are sent only to contractors or suppliers specifically selected to submit tenders or proposals.

“Invitational Tender”: An Invitational Tender (IT) are those tenders for which tender documents are sent only to contractors or suppliers specifically selected to submit tenders. For readers not familiar with GN contracting practices, please note that outside Nunavut, Invitational Tenders are generally referred to as Solicited Tenders.

“Invitational Request For Proposal”: An Invitational Request For Proposal (IRFP) are those proposals which are sent to contractors or suppliers selected to submit proposals.

“LCA” or “Local Contract Authority”: means contracts using an LCA form for local purchases that do not exceed \$5,000 in value. Use of this form is restricted to contracting with parties located in Nunavut.

“Purchase Orders”: In this report, “Purchase Orders” means contracts for purchase of goods, primarily entered into by the Contracts and Procurement Purchasing Section on behalf of Government of Nunavut departments.

“Public Tender”: A Public Tender are those tenders which are publicly advertised.

“Request For Proposal”: An Request For Proposal (RFP) has been defined as follows, “when the Government knows what end result should be, but not necessarily how best to achieve it; therefore Government seeks *proposals* on methods, ability, and price. Government can thereby negotiate the best method to achieve the best value.”

“Sole Source”: A Sole Source is best defined by setting out the criteria. The Government of Nunavut contract regulations, under the Financial Administration Act, allow sole sourcing of contracts where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (a) the goods, services or construction are urgently required and delay would be injurious to the public interest; or
- (b) only one party is available and capable of performing the contract; or
- (c) the contract is an architectural or engineering contract that will not exceed \$25,000; or
- (d) or any other type of contract that will not exceed \$5,000 in value."

"Tender": Tenders may be obtained by public advertisement or private invitation. It should be noted that, generally, the value and type of contract will determine the type of tendering to be used.
